The Outsiders Close Reading and Text-Dependent Questions

The marriage of Virginia and Leonard Woolf is best understood as a dialogue of two outsiders about ideas of social and political belonging and exclusion. These ideas infused the written work of both partners and carried over into literary modernism itself, in part through the influence of the Woolfs'
groundbreaking publishing company, the Hogarth Press. In this book, the first to focus on Virginia Woolf's writings in conjunction with those of her husband, Natania Rosenfeld illuminates Leonard's sense of ambivalent social identity and its affinities to Virginia's complex ideas of subjectivity. At the time of the Woolfs' marriage, Leonard was a penniless ex-colonial administrator, a fervent anti-imperialist, a committed socialist, a budding novelist, and an assimilated Jew who vacillated between fierce pride in his ethnicity and repudiation of it. Virginia was an "intellectual aristocrat," socially privileged by her class and family background but hobbled through gender. Leonard helped Virginia elucidate her own prejudices and elitism, and his political engagements intensified her identification with outsiders in British society. Rosenfeld discovers an aesthetic of intersubjectivity constantly at work in Virginia Woolf's prose, links this aesthetic to the intermeshed literary lives of the Woolfs, and connects both these sites of dialogue to the larger sociopolitical debates--about imperialism, capitalism, women, sexuality, international relations, and, finally, fascism--of their historical place and time.

The Language of Patient Feedback provides a unique insight into a diverse range of issues related to healthcare. Through the comprehensive and detailed interrogation of 29 million words of online patient feedback on the NHS in England, as well as 11 million words of responses to the feedback from NHS providers, this book: Uses a combination of computer-assisted and human analysis (Corpus-Assisted Discourse Analysis) to examine the extent to which characteristics like age and gender result in different types of evaluation. Investigates why nurses, doctors, dentists and receptionists are associated with very distinct types of feedback. Demonstrates the ways that NHS staff respond to comments and what this reveals about underlying institutional ideologies and practices. Concludes with suggestions for key recommendations that the NHS could act upon to improve the overall level of care it provides, as well as reflecting on what patient evaluation can actually tell us. The Language of Patient Feedback is key reading for anyone undertaking research within corpus linguistics, discourse analysis and health communication.

According to Jackson W., some traditional East Asian cultural values are closer to those of the first-century biblical world than common Western cultural values. In this work Jackson demonstrates how paying attention to East Asian culture provides a helpful lens for interpreting Paul's most complex letter, and we see how honor and shame shape so much of Paul's message and mission.

Coaching the Team at Work 2

Fred Greenstein has been a paragon of scholarship and practical advice in his many years of work on the presidency. Here, some of the leading scholars of the presidency and leadership studies come together to pay tribute to Greenstein and his work. Original essays reflect the broad sweep of Greenstein's scholarship from the systematic study of personality and politics to the analysis of chief executives from Woodrow Wilson on. The essayists pay special attention to the political styles, advisory systems, and decision-making processes of presidents from the 1920s to today. In his studies of the American presidency, Greenstein pioneered the use of archival documents to test hypotheses and illuminate issues that bear on the performance of the modern executive office. The distinguished list of contributors to this volume include John Burke, Robert A. Dahl, Alexander and Juliette George, Betty Glad, Alonzo Hamby, Erwin Hargrove, John Kessel, Anthony King, Kenneth Kitts, J. Donald Moon, and Fred Greenstein's first and last graduate students at Princeton--Larry Berman and Meena Bose.
Greenstein himself generously writes a new essay on 'Plumbing the Presidential Psyche,' adding to his substantial contributions to political psychology.

The study of how linguistic variation is acquired is considered a nascent field in both psycho- and sociolinguistics. Within that research context, this book aims at two objectives. First, it wants to help bridging the gap between researchers working on acquisition from different theoretical backgrounds. The book therefore includes contributions by both psycho- and sociolinguists, and by representatives of further relevant sub-disciplines of linguistics, including historical linguistics and dialectology. Second, in order to enable cross-linguistic comparison, the book brings together research carried out in different sociolinguistic constellations, as most obviously found in different language areas or different countries.

Het Glazen Paleis

‘This book is a must for anyone involved in organizational coaching' Adrian Moorhouse, Managing Director, Lane4 & Olympic Gold Medallist Coaching the Team at Work 2 is the result of research over 20 years with practising team coaches and with major corporations around the world. It recognises that in a complex and constantly evolving business and social environment, teams can only keep up if they adapt frequently. But to adapt, they must have clarity about their internal and external systems and how these contribute to or undermine performance. There are multiple aspects of team function that underpins performance - and each influences and is influenced by the others. This revised edition explores the six most significant aspects: * Purpose and motivation * Systems and processes relating to external stakeholders * Relationships, especially within the team * Systems and processes relating to internal functions (such as quality and decision-making) * Learning (how the team adapts to keep up with the pace of change) * Leadership (how the functions of leadership are exercised within the team)
When these aspects are aligned, a team can perform at its best; but when any one or more of the aspects is malfunctioning, the result is underperformance. This book helps team coaches develop their skills to support teams in understanding these complex dynamics and, as a result, in developing more effective ways of working together.

Acquiring Sociolinguistic Variation

Teaching in remote, distance, and hybrid environments can be overwhelming and confusing and poses many challenges for novice and veteran teachers alike. This book guides teachers through the best practices of English language arts (ELA) instruction and helps them reflect on ways to apply those practices in remote learning and envision future instruction that draws from the most useful aspects of educational innovations. Understanding that remote teaching looks different in each subject, Ruday and Cassidy identify methods specifically designed for middle and high school ELA classrooms. Designed for use in remote, hybrid, and hyflex environments with synchronous or asynchronous learning, this resource gives teachers a toolbox of research-backed recommendations, ideas, examples, and practices for teaching in unpredictable and new environments. Ruday and Cassidy address essential topics, including writing, grammar, and reading instruction; assessment; differentiation; culturally relevant teaching; family engagement and communication; technology; professional self-care; and more. Teachers will come away with ready-to-implement strategies and insights for high-quality instruction that can be adapted to any kind of remote learning environment.

Based on extensive, long-term fieldwork in the borderlands of Afghan and Tajik Badakhshan, this book explores the importance of local leaders and local identity groups for the stability of a state’s borders, and ultimately for the stability of the state itself. It shows how the implantation of formal institutional structures at the border, a process supported by United Nations and other international bodies, can be counterproductive in that it may marginalise local leaders and alienate the local population, thereby increasing overall instability. The study considers how, in this particular borderland where trafficking of illegal drugs, weapons and people is rampant, corrupt customs and border personnel, and imperfect new institutional arrangements, contributed to a complex mix of oppression, hidden protest and subtle resistance, which benefitted illicit traders and hindered much needed humanitarian work. The book relates developments in this region to borderlands elsewhere, especially new borders in the former
Soviet bloc, and argues that local leaders and organisations should be given semi-autonomy in co-
ordination with state border forces in order to increase stability and the acceptance of the state.

"The authors have done a commendable and impressive job of addressing a topic of long-lasting and increasing significance in U.S. politics." ---F. Chris Garcia, University of New Mexico "This is a path-breaking book that will be read across disciplines beyond political science." ---James Jennings, Tufts University Over the past four decades, the United States has experienced the largest influx of immigrants in its history. Not only has the ratio of European to non-European newcomers changed, but recent arrivals are coming from the Asian subcontinent, Southeast Asia, South America, and other regions which have not previously supplied many immigrants to the United States. In this timely study, a
team of political scientists examines how the arrival of these newcomers has affected the efforts of long-
standing minority groups—Blacks, Latinos, and Asian Pacific Americans—to gain equality through
greater political representation and power. The authors predict that, for some time to come, the United
States will function as a complex multiracial hierarchy, rather than as a genuine democracy. Ronald
Schmidt, Sr. is Professor of Political Science at California State University, Long Beach. Yvette M. Alex-
Assensoh is Associate Professor of Political Science and Dean of the Office for Women's Affairs (OWA)
at Indiana University, Bloomington. Andrew L. Aoki is Professor of Political Science at Augsburg

Most of these thirty-one essays by Richard Bauckham, a well-known New Testament scholar, were first
published between 1979 and 2015 in journals and multi-authored volumes. Two are previously
unpublished and one has not been published in English before. They range widely over early
Christianity and early Christian literature in both the New Testament period and the early patristic
period, reflecting the author's conviction that the historical study of early Christianity should not isolate
the New Testament literature from other early Christian sources, such as the apostolic fathers and the
Christian apocryphal literature. Some of the essays develop further the themes of the author's books on
aspects of the Gospels, such as the intended audiences of the Gospels, the way in which Gospel
traditions were transmitted, the role of the eyewitnesses in the origins of the Gospels, the importance of
Papias's evidence about Gospel traditions, and the relationship between canonical and Gnostic
Gospels. Some of the essays relate to important persons, such as Peter, Barnabas, Paul and James.
These include a full investigation of the evidence for the martyrdom of Peter and an attempt to locate
the estate of Publius where Paul stayed on Malta. There are studies of the Sabbath and the Lord's Day
in both the New Testament and patristic periods. There are studies that survey most of the main
categories of apocryphal Christian literature, including apocryphal Gospels and Acts, and with a special
focus on the non-canonical apocalypses, such as the Apocalypse of Peter and the Latin Vision of Ezra.

"Copyright law is a critical issue for authors, librarians, publishers, and information vendors. It is also a
complex area, with many shades of gray. Librarians continually need to seek answers to questions
ranging from the reproduction of copyrighted works for library users, through the performance of
audiovisual works, to the digitization and display of protected works on library websites. This book
presents updated versions of the author's copyright columns published in Against the Grain, the leading
journal in acquisitions librarianship since the late 1990s. The volume is presented in question-and-
answer format. The questions are real, submitted by librarians, educators, and other information
professionals who have attended the author's copyright law workshops and presentations or submitted
them to her by e-mail or telephone. The author has selected the questions and answers that have
general applicability. She has then arranged them into logical chapters, each prefaced by a short
introduction to the topic. Because it is written in an accessible and clear style, readers may want to
review the entire work or they can just access particular chapters or even specific questions as they
need them. The volume includes an index to facilitate reference use."--
